Mission Statement

The Science and Technology in Society *forum* (STS *forum*) is a global initiative which was successfully launched in November 2004 in order to properly control the negative aspects and deliver the benefits of science and technology to the parts of the world where they are needed, providing a new mechanism for open discussions on an informal basis, and building a human network among the world's most influential people in business, politics, academia, research/science, government, and the media that would, in time, resolve the new types of problems stemming from the application of science and technology.

We are requesting organizations that align with the mission, vision and purpose of the STS *forum* and see value in being identified as supporting us, to become members. They have a unique opportunity to exercise leadership and governance in this global science and technology initiative.
