<tr>
<td></td>
<td>Session Description: As life expectancies are increasing around the world, what are the main health and societal challenges that we are facing? How can we increase “healthy life expectancy”? What are the latest findings in terms of physical, mental and neurological areas that would bring better perspectives for prevention and therapy of age-related conditions? What are the technological and social innovations (including financial solutions) that would enable further independence and dignity for the elderly, without added burden to society? What are the best practices that we can learn from each other?</td>

| 16:15 – 17:20 (65 min) | **PANEL 2: The Future of Sustainable Agriculture and Food Security**  
Session Description: Given the challenges posed by climate change, how can we secure sources of sustainably-produced food with a background understanding of the conflicting demands on land? 
What are the science-based solutions that ensure safe and sustainable agriculture and sources of different nutrients needed by the world population? 
How do we ensure that these solutions can be equally shared by those who need the most? |
